

Presentation

This event, addressed to physicians (specialized in Haematology & Oncology) now in its 9th edition, wants to be an update in oncology and hematology, with an in-depth examination of emerging issues and results of new diagnostic and therapeutic approaches to the treatment of multiple myeloma. Several topics will be discussed, such as young and elderly protocols, biological activities, asymptomatic myeloma and rare diseases, guidelines. This event aims to encourage the development of controlled clinical studies to assess the efficacy and the safety of these new combinations and improve clinical practice in Onco-hematology. The event will include slide presentations and open discussion among all participants.
